CodeWeek.@School

< What is EU Code Week? >

EU Code Week celebrates creativity, problem solving and collaboration through coding and other tech activities. This year, schools and teachers of all levels and subjects are invited to participate. Learn more and add your activity to the Code Week map via the webpage specially dedicated to teachers: **codeweek.eu/schools**

< Why should you get involved? >

Coding helps develop 21st century competences such as computational thinking, problem solving, creativity and teamwork

EU Code Week offers all students the possibility to make their first steps as digital creators, by providing schools and teachers free professional development opportunities, teaching resources, international challenges and opportunities to exchange.

By joining the EU Code Week and the **Code Week 4 All challenge**, you can earn a Certificate of Excellence!

< How can you get involved? >

Organise an activity, whether it be a lesson, training session, webinar, workshop, or event, and pin it on the **interactive map** by registering online!

Build a network of activities, engage as many students as possible, and earn a Certificate of Excellence through the **Code Week 4 All challenge**

Spread the word among your colleagues and invite them to join EU Code Week as well!
